SERIES 2024

For Your Living Spaces Nelson Bubble Lamps

Nelson Bubble Lights, a variety of light fixtures in a variety of spherical silhouettes, add softness and brightness to interior spaces. Designed by George Nelson in 1952, these elegant fixtures are made of a sturdy, lightweight steel frame yet have a delicate, floating structure.

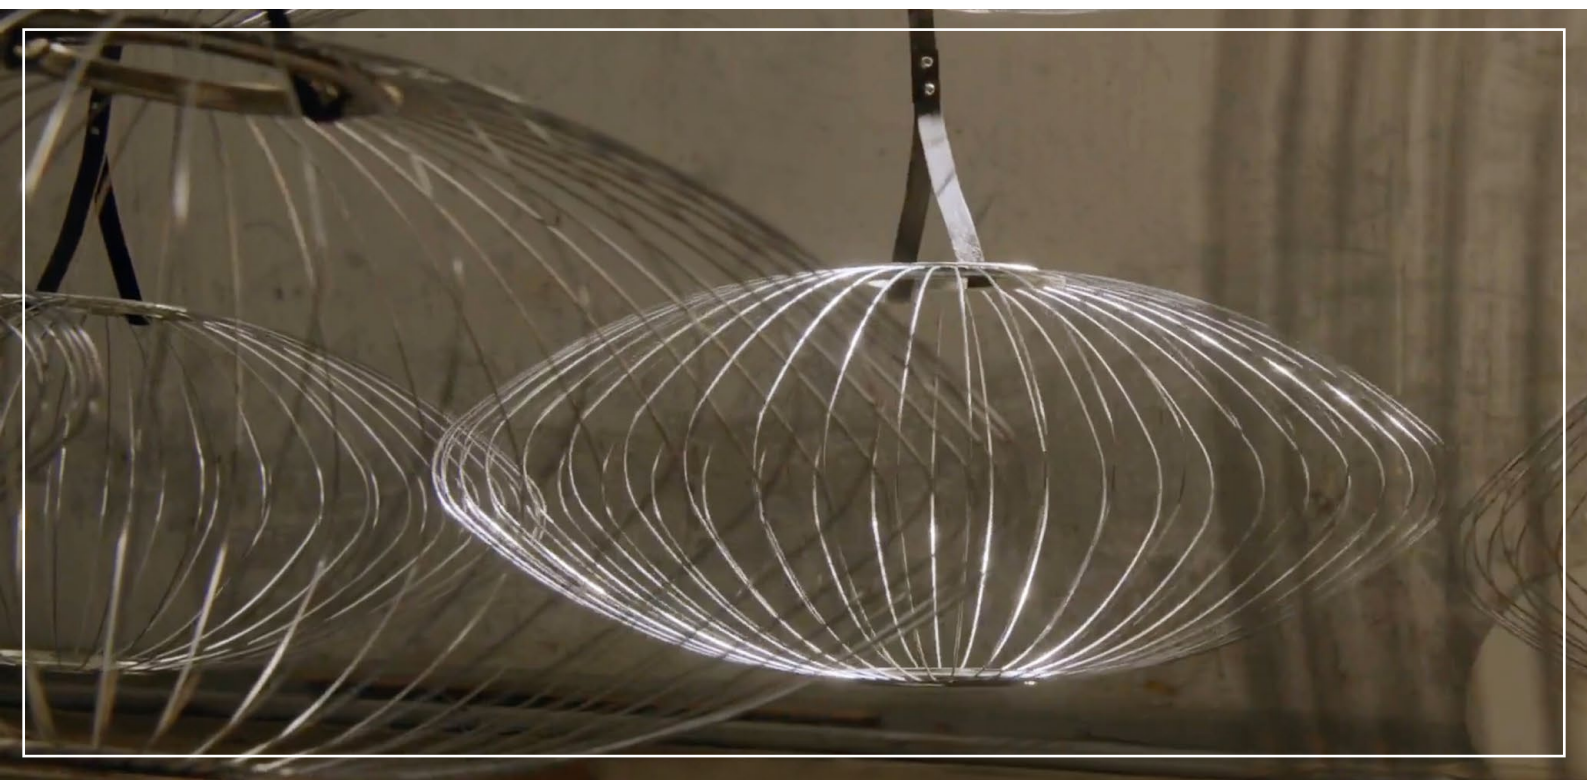

Nelson was inspired by a set of silk-covered Swedish pendant lights he wanted for his office, but found the price prohibitive. An ingenious and resourceful designer, he went on to create the first set of Nelson Bubble Lights using translucent white plastic spray, a technique developed by the U.S. military at the time. Nelson used basic, organic shapes to create variations such as the Apple Bubble Necklace and the Saucer Bubble Necklace, among others.

1- Organic shape.

Translucent plastic polymer body.

2- Visible steel substructure

Sturdy yet lightweight steel gives shape to your Bubble Lamp.

3- Polymer shade

Provides a soft, homogeneous light.

A soft glow

Nelson Bubble Lamps are a range of lamps with a variety of spherical silhouettes that emit even quality light. The wide shape of the Nelson Saucer Bubble Pendant and the gently flowing lines of its steel substructure add a pleasant shape and soft light to any interior. This pendant lamp is available in small, medium, large and extra large sizes. George Nelson first designed the series in 1952 when he came across a Swedish style pendant lamp for his office. The high price challenged him and led him to create his own Bubble Lamp series.
